NATURAL PINE
Aurora

Nature can work magic with her mystical powers. Surely one of the most beautiful natural phenomena is Aurora Borealis, or the Northern Lights. A sensational light show of purple and green shades lighting up the sky is truly breathtaking. Northern Lights take you to Scandinavia, where Christmas is full of traditions and comforting 'hygge' style. Have a mug of hot chocolate in front of the fireplace, already flanked with the Christmas stockings waiting for the gifts.

A prelit Christmas tree with twinkling lights. The 'Natural Pine Aurora' collection is inspired by this beautiful northern area and its charming Christmas traditions: artificial Christmas trees that are indistinguishable from real ones.

You can hardly see that it is an artificial Christmas tree: unique in the market! Every detail of the snowy artificial trees makes it look like covered by natural snowfall. Having a 'Natural Pine Aurora' tree in your home is a sustainable choice.

The LED tree lights don't require the purchase of loose batteries. The lights incorporated into the trees are mini and micro LEDs, and can be powered by a USB kit that we offer separately. *(see BATTERY SAVER kit on page 21)* The prelit artificial trees are easy to set up. The lights are built in and ready for use. No more time wasted on untangling cords and placing the lights: everything is perfectly and evenly spaced around the tree.

You can count on Hogewoning's great value for money. After registration, you have a ten-year warranty on the artificial Christmas trees and a two-year warranty on the LED lights. The collection offers the most beautiful, natural-looking artificial prelit trees at the very best price.

What is a Christmas tree without accessories? Besides the artificial trees, we offer different products such as a beautiful prelit Christmas wreath for the front door, a swag or garland in the windowsill, a small tree for a cozy feeling: everything for the Christmas mood.

There are three variations of the products available: pre-lit, unlit, and a French version specifically tailored for the French market to comply with all local requirements and standards.
